

How You Know It's Time to Ditch the Spreadsheet

for Tracking IT Inventory and Costs

To manage your telecom, mobility, and cloud spend, Excel is a great place to start. But when you reach a certain level of complexity, you need a purpose-built solution. Find out which stage you're at.

Which sounds like your IT department?

SCENARIO A

You don't know what inventory you have

You're paying for unused devices and services

Analysts spend 80% of their time manipulating data in unwieldy, multi-tab spreadsheets

You don't know what you're paying for

Bills are paid late and you're incurring late fees

You're overpaying your providers

You have to dedicate many resources to tracking IT spend

You're ripe for a more mature solution. Cimpl can help you move from Scenario A to B!

SCENARIO B

You know what inventory you have

All unused devices and services are known and payment is stopped

You flipped the 80/20 ratio, and your analysts spend most of their time analyzing data and sharing it with business units

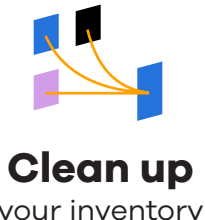

All your telecom, mobility, and cloud invoices are correctly linked to your inventory

The billing cycle is reduced to 2 days and all bills are paid on time, guaranteed

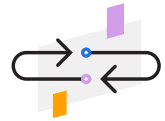

You identify contract discrepancies and billing errors so you don't overpay

You can assign fewer resources to tracking IT spend, and use our TEM service to do the work for you

You're doing great! (Sounds like you might have Cimpl.) Keep doing what you're doing.

Clean up
your inventory

Uniquely marry
invoices to inventory

Reduce
your technology spend by 20%

Uncover
contract discrepancies and detect billing errors (up to 18% of invoices contain errors)

Generate
zero-usage reports to easily identify unused assets, saving you tens of thousands of dollars a year

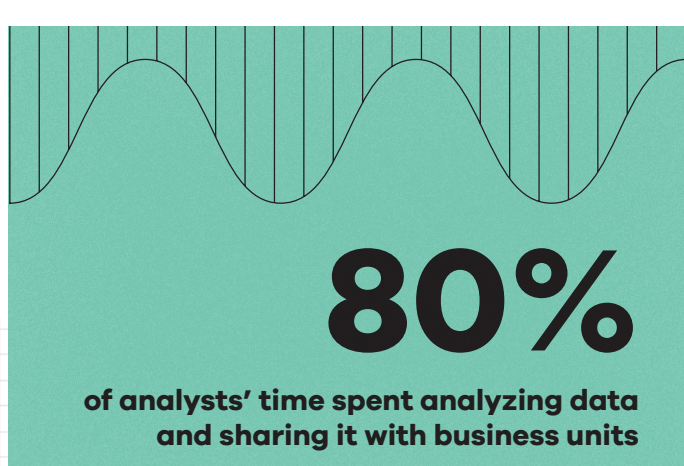

Produce
allocation reports to showback/chargeback to business units

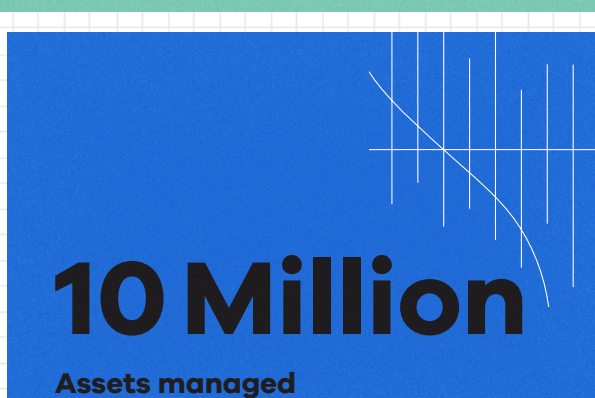

Gain
a virtual outsourced IT team that manages your services so you don't have to

Upland Cimpl technology expense management (TEM) software will

Typical results with Cimpl

Did you know?

Typically, 3% of an organization's inventory changes every month, and up to 18% of provider invoices contain errors!
