

Project Portfolio Management

Simple, powerful project and portfolio management software for today's workplace

Eclipse Project Portfolio Management software delivers a robust, Cloud-Based Project Portfolio Management solution management that allows organizations to start simply, show business value quickly and grow with the application.

Eclipse PPM focuses on three key areas: Portfolio Management, Project Management, and Resource Management. The solution focuses on improving project prioritization and execution, while improving communication and collaboration amongst stakeholders, project managers and resources. It also helps solve the challenge of delivering projects and operational services with constrained human resources.

Eclipse PPM has been successfully implemented in hundreds of organizations using the 'keep it simple' implementation approach. Eclipse PPM Implementation Consultants work with each organization to understand the process maturity level and develop an implementation plan that introduces change incrementally. As the Eclipse PPM adoption expands and the processes begin to improve and mature, Eclipse PPM can be rolled out to more and more users in the organization.

Benefits

- **Eclipse PPM simple to implement, use and support:** Eclipse PPM was created with the end user in mind. Management, Project Managers and Resources can all access Eclipse quickly and easily. Organizations are successful, because user adoption rate is quick and making Eclipse PPM a part of everyday process is simple.
- **Leading edge technology:** Eclipse PPM is a Rich Internet Application (RIA) that is incredibly easy to use. The RIA interface allows users to customize dashboards with the ease of drag-and-drop technology, and edit project financials, schedule information and time tracking as if they were working in a spreadsheet.
- **Low total cost of ownership:** Eclipse PPM is hosted in a highly secure data center. This fact, combined with our streamlined implementation process and scalable licensing fees, results in low total cost of ownership for organizations of all types and sizes.

"Eclipse PPM has allowed us to centralize the management of our IT portfolio, and given us a way to standardize how we execute projects. It has provided a view into resource allocation, which has helped tremendously to balance resources across the organization. We look forward to rolling out additional features in 2016, and are excited about the possibilities."

— Barinder Khurana, Director of PMO & VMO, ProSight Speciality Management Company, Inc.

Upland Software provides Cloud Solutions across the enterprise enabling amazing customer outcomes in:

- + PROJECT & IT MANAGEMENT
- + WORKFLOW AUTOMATION
- + DIGITAL ENGAGEMENT

How Can I Benefit?

Leadership Team

Real time portfolio, project and resource information at their fingertips

- A single location for all projects
- Project Intake, Prioritization and Selection
- Project Oversight, Execution and Reporting
- Configurable Real-time Dashboards

The screenshot shows a resource management dashboard with a table for 'Total Resource Types' and 'Total Resource(s)'. The table has columns for months from Jan 15 to Dec 15, with sub-columns for 'Planned' and 'Actual' time. It lists resources like 'Becker, Anne' and 'MacDonald, Carolyn' with their respective availability and demand over time.

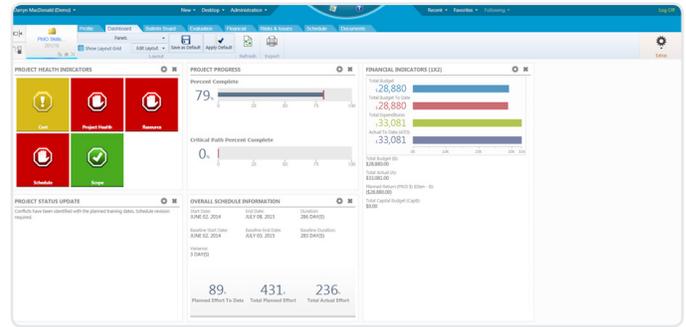

Resource Managers

Take the guess work out of Resource Management

- View resource capacity & availability and actual vs. planned time
- Quickly understand where resources are overworked and where there is capacity to take on more work

About Upland Software

Upland Software (Nasdaq: UPLD) is a leading provider of cloud-based Enterprise Work Management software. Our family of applications enables users to manage their projects, professional workforce and IT investments, automate document-intensive business processes and effectively engage with their customers, prospects and community via the web and mobile technologies. With 2,000 customers and over 235,000 users around the world, Upland Software solutions help customers run their operations smoothly, adapt to change quickly, and achieve better results every day. Project Managers

For all types of Project Managers

- Provides a single dashboard view of the project
- Identify immediately when a project is running late, over budget or has issues
- Manage: schedule, financials, risks, issues, documents, and more

The screenshot displays a project list table with columns for 'Project Name', 'Status', 'Priority', 'Start Date', 'End Date', and '% Complete'. It lists various projects such as 'Equipment Procurement RFP' and 'Medical Student Orientation'.

Resources

Team collaboration and communication of progress on tasks and deliverables

- View and update work projects, tasks, issues and risks relevant to you in real-time, on your smartphone, tablet, desktop or by email
- Personalized time sheets make time entry quick and easy
