

Project Portfolio Management for Healthcare

Simple, Powerful Project and Portfolio Management Software for Healthcare Organizations

Eclipse Project Portfolio Management software delivers a robust, cloud-based Project Portfolio Management solution that enables organizations to succeed and derive value quickly and efficiently.

Healthcare organizations face more pressure and challenges than ever before from having too many projects, limited resources and budgets, with a constant stream of new requests and significant operational commitments.

Eclipse PPM supports healthcare organizations in three key areas:

- **Portfolio Management**
- **Project Management**
- **Resource Management**

The solution focuses on improving prioritization, execution, and visibility across all projects, while improving communication and collaboration amongst stakeholders, project managers, and resources. It also helps to solve the challenge of delivering projects and operational services with constrained human resources.

Eclipse PPM provides an easy to use, out-of-the-box solution that is well suited for healthcare organizations. The solution has been successfully implemented in hundreds of organizations using the 'keep it simple' implementation approach.

Benefits

- **Simple to implement, use and support:** Eclipse PPM was created with the end user in mind. Management, Project Managers, and Resources can access Eclipse quickly and easily. Organizations achieve success through easy adoption, making Eclipse PPM a part of everyday processes.
- **Leading edge technology:** Eclipse PPM is an easy-to-use Rich Internet Application (RIA). The RIA interface allows users to customize dashboards with the ease of drag-and-drop technology, and edit project financials, schedule information, and time tracking as if they were working in a spreadsheet.
- **Low total cost of ownership:** Eclipse PPM is hosted in a highly secure data center. Enterprise-level security, combined with streamlined implementation process and scalable licensing fees, results in low total cost of ownership for organizations of all types and sizes.

Why Eclipse PPM?

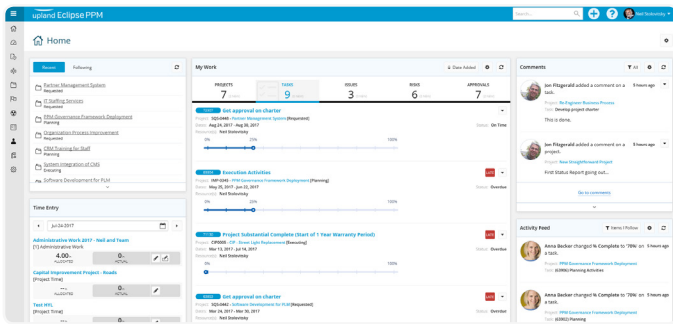

- Transparency for all stakeholders on current and future projects
- Resource Understanding – current resource availability for projects
- Central location of all information to track ROI and benefits from the project
- Full alignment of all projects with strategic initiatives of the organization
- Visibility of all resources, projects and status

"Eclipse has become an invaluable tool to manage and plan our project workload and to identify and manage the resources required to handle them."

— Mark A. Farrow, Director, ICT,
Hamilton Health Sciences

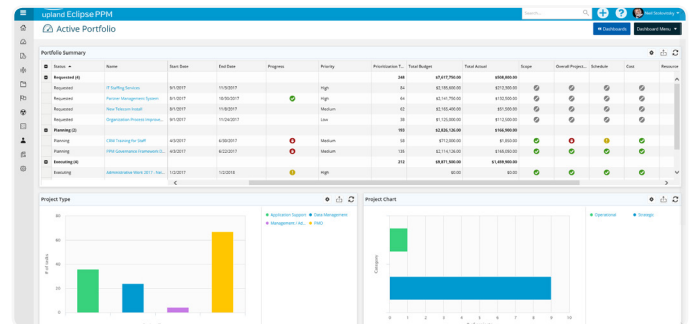

Hamilton Health Sciences

Eclipse Home

One-stop landing page enables users to interact with time-relevant work items without digging through the application.

- Review and take action on your time-relevant work items from the “My Work” panel
- Improve time-entry compliance by using the daily “Time Entry” panel
- Collaborate with other users via the “Comments” panel
- Get updates on activity using the “Activity Feed” panel

Dashboards

Track and investigate your entire portfolio from one place with our powerful and performant dashboards.

- Highly configurable layouts and data panels
- Advanced charting with drill-down functionality for deeper investigation
- Tabular data can be grouped, sorted, and aggregated to meet your organizational reporting needs

Timesheets

Track and approve resource time at a granular level across projects and tasks.

- Users can build a timesheet based on their scheduled work, and by adding other items on demand
- Approvals can be configured per project or resource depending on your organizational requirements
- Help management understand the time-entries by adding notes at the daily or weekly level

Resource Planning and Management

Effectively plan, allocate, and monitor resource demand and utilization across the entire project portfolio.

- Build high-level resource plans using generic or actual resources, and perform “what-if” analysis before a detailed work plan is defined
- Review, manage, and report on work plan allocations across the entire portfolio
- Pivot data by project or resource to analyze from a project manager or resource manager perspective

About Upland Software

Upland Software (NASDAQ: UPLD) is a leading provider of cloud-based Enterprise Work Management software. Our family of applications enables users to manage their projects, professional workforce and IT investments; automate document-intensive business processes; and effectively engage with their customers, prospects and community via the web and mobile technologies. With more than 2,500 customers and over 250,000 users around the world, Upland Software solutions help customers run their operations smoothly, adapt to change quickly, and achieve better results every day.
