

# AI Eliminates Manual Document Processing.

Secure, HIPAA-compliant fax with built-in AI extracts patient data, classifies clinical documents, and automatically routes them, transforming your document workflows without changing how providers send and receive faxes.

**Automatically turn referrals, lab results, and authorizations into structured EHR data.**

## Intelligence Built-In, Not Bolted On

- Auto-classify referrals, labs, prescriptions, and authorizations.
- Extract patient data, demographics, insurance, diagnosis codes, etc.
- Route documents to automatically reach the correct destination.
- Process handwritten forms, prescriptions, and notes.
- Configure rules without IT thanks to no-code workflows.

## Enterprise Trust Minus the Friction

- Complete HIPAA-compliant audit trails for every action.
- Comply with secure standards, including SOC 2 Type II & ISO 27001
- Flag sensitive information with PII/PHI detection.
- Fortify transmissions with data-residency controls and TLS encryption.
- InterFAX+AI never uses healthcare data to train AI models.

# InterFAX+AI evolves by building smarter healthcare workflows that advance with you.

Whether you're a single-facility practice or a multi-hospital system, InterFAX+AI drives lasting improvement in how information moves and decisions are made.

## Seamless EHR integration eliminates double entry

- **Integration-ready APIs:** RESTful and SOAP for major platforms
- **Automatic data flows:** Populates charts without manual entry
- **Visual workflow designer:** Business users configure rules directly
- **Mixed-document separation:** Splits and routes multi-page faxes

## Reduce IT burden while improving reliability

- **Pure cloud architecture:** Zero servers to maintain or patch
- **Auto-scales for volume:** Handles surges without planning
- **Flexible customization:** Connect proprietary or specialized systems
- **Deploy in days:** Standard integrations accelerate setup

## Ready to get things done?

Let us show you what InterFAX+AI can do.
