

Cloud Fax for Education

In May 2026, a massive breach of the online education platform Canva compromised the data of 275 million users. More than 9,000 schools were affected, highlighting the need for institutions to invest in trusted technology partners. Upland InterFAX delivers enterprise-grade security measures designed to protect sensitive information and provide peace of mind.

Keep student data secure.

In 2025, 3.9 million education records were exposed. That's an increase of 27% from the previous year.

Online fax provides secure document transfer to protect student privacy while reducing hardware upkeep and IT costs for the university.

InterFAX offers robust security features such as Sarbanes-Oxley, PCI DSS, and HIPAA to safeguard sensitive materials.

Easily manage student-facing processes.

Colleges and universities use web-based fax to manage student processes seamlessly.

Track and manage transcript requests and new student paperwork.

Keep residential records to financial and medical information flowing smoothly, while ensuring security and compliance with varying governmental oversights.

Faxing confidential documents is as easy as sending an email.

- Simplify the enrollment and admissions processes.
- Expedite access to student health services and housing.
- Streamline grant management and scholarship communications.
- Boost efficiency while adhering to global security standards.
- Add unlimited users at no additional cost.
- Transition to the cloud from outdated, expensive copper lines.

- Accelerate secure fax communications between multiple offices or locations, including staff who work from home.
- Ensure compliance through adherence to HIPAA, PCI DSS, and ISO 27001 regulations.
- Protect student data with a cloud fax service that is both HIPAA- and PHIPA-compliant.
- Give staff working from anywhere access to cloud faxing through our secure, web accessible InterFAX Control Panel (CP).
- Send student information directly from a fax queue to the CRM or Student Information system (SIS).
