InterFAX Cloud Service

Recipient
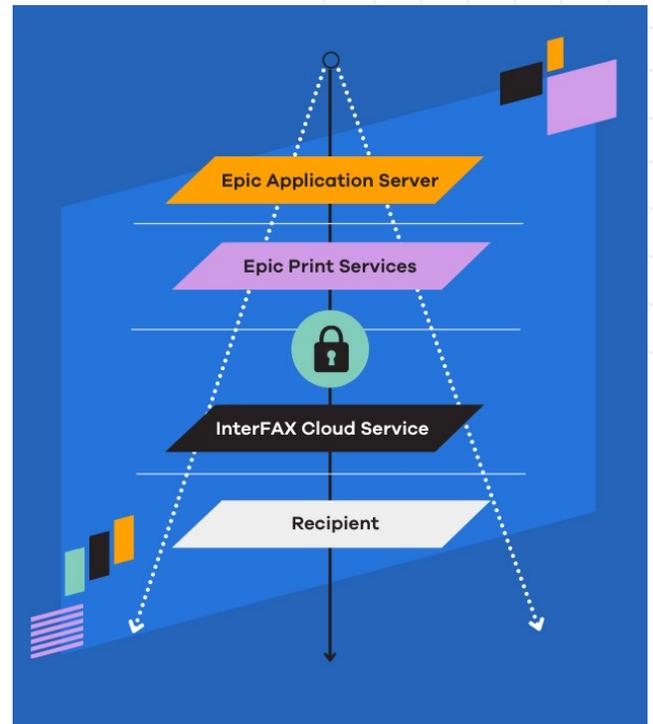

Manage work faster and smarter.

Accelerate communications and data exchange by allowing users to send or receive cloud faxes and access PHI from one place.

- Send faxes directly from the Epic interface for everything from patient referrals, to physicians' notes, prescriptions, lab results, and more

- Automatically deliver inbound faxes to specific network folders and attach them to the right patient record

Access content quickly and securely.

Get the content you need and ensure HIPAA, PHIPA, and PCI DSS compliance, all in one step.

- Access detailed records of every fax transmitted or received via the InterFAX web portal

- Create reports on fax usage by patient, sender, recipient, or customized fields to ensure compliance

- Benefit from incredible global customer support for any issues you may encounter

Get secure, reliable cloud fax in no time.

InterFAX works seamlessly with Epic 2017+. Quickly and easily set up an account, transfer any existing fax numbers, and contact your Epic representative to begin faxing immediately with no service downtime.

Rest easy with secure, compliant fax

Data security is critical. InterFAX employs TLS encryption, user authentication, "delete upon delivery," and more to ensure compliance with HIPAA, PHIPA, and PCI DSS.

Get more done from the Epic dashboard

Send faxes, verify delivery, access detailed records, utilize Epic data fields for enhanced reporting, and more all from your Epic dashboard.

Communicate securely and reliably

InterFAX accelerates the communication of patient records, medical requests, and data exchange with other providers.

Ensure every single fax is received

InterFAX verifies the fax was delivered to the right recipient, every time. Even in cases of failure, InterFAX will retry up to six times to transmit the message.

Improve reporting using metadata

Send Epic data fields as metadata to streamline search and filter capabilities and enhance reporting capabilities.

Ditch fax servers and go to the cloud

Reduce the burden of on-premise hardware and software maintenance for your IT team and let us handle the details.
