Why global businesses choose us

Choice

Comprehensive product library delivers critical “last mile” capabilities at enterprise scale with rapid time to value

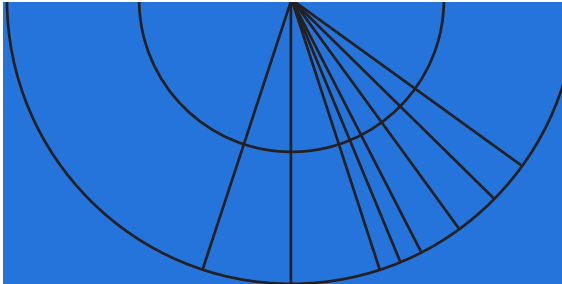

Flexibility

Configurable to work with current infrastructure, extend existing platform investments, and retire home grown tools

Value

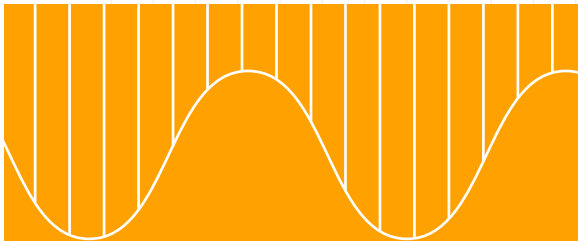

Well-capitalized, long-term partner enables vendor consolidation and bundle pricing with global innovation, enhanced security, service, and support

Our values

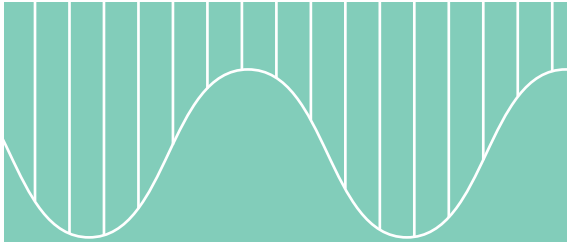

Customer value is our fuel

Value is making a difference for our customers each and every day. That's what powers our business and energizes us.

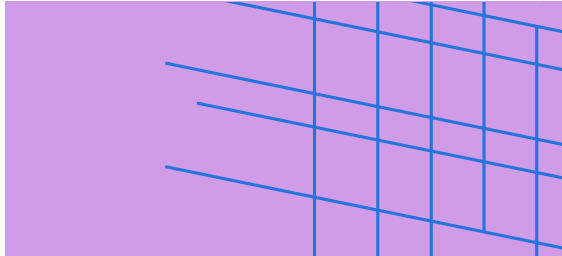

Actions speak louder than words

When challenges arise, we rise to the occasion. We roll up our sleeves, get to work, and get the job done.

Experience is a superpower

We are a team of experts who know how to work together to tackle real challenges and create success.

What you see is what you get

We are genuine, honest, and grounded in what's possible. We're intentional in everything we choose to do.

People are our most important asset

We are humans helping other humans, and want everyone to feel seen, respected, and heard.

Our global presence

Our teams span multiple continents, and our remote workforce stretches even further. It's like a giant mind-meld across thousands of miles and multiple time zones.

Fax Industry Market Projections

According to our latest research, the global online fax market looks promising in the next 5 years ... with a CAGR of 6.72% during the forecast years.

As per the report released by Kings Research, the global [online fax market](#) size ... is estimated to grow to **USD 12.32 Billion** by 2030, exhibiting a **CAGR of 12.75%** over the forecast period of 2023-2030. The industry is experiencing rapid growth due to the rising adoption of cloud-based storage and archiving functionalities, enabling users to access their faxes remotely. The increasing use of online faxing in a wide range of sectors can be attributed to factors such as the escalating demand for secure and fast communication.

Market Projections (continued)

The worldwide cloud fax market size is expected to grow from 770.48 million in 2023 to USD 2053.60 Million by 2033, at a Compound Annual Growth Rate (CAGR) of 10.3% during the forecast period.

The global **fax machines** market is estimated to grow at a Compound Annual Growth Rate (CAGR) of 5.3% during the forecast period from 2019-2028. The growth can be attributed to factors such as rising demand for improved connectivity and rise in governmental regulations on data security which has resulted in increased adoption of digital communication systems, especially among government organizations and enterprises across the world.

Fax Server Market

The global fax server software market is expected to witness a CAGR of 8.5%. By 2026, market size estimates are around USD \$6.1 billion, according to the latest research report by Verified Market Reports. The market is driven by increasing adoption of advanced technologies, such as cloud computing & virtualization, which has made it easier for organizations to deploy & manage fax services.

High Cost of Implementation and Maintenance Licenses must be purchased, & resources must be allocated to set up, configure & maintain the system, causing a significant barrier to adoption.

Interoperability Issues with Existing Fax & Telephone Systems Fax server software must be able to effectively communicate with existing fax & telephone systems to be useful. Unfortunately, many fax server software solutions are not able to due to incompatibilities or lack of support for necessary standards. This can limit the usefulness of the software and make it difficult for businesses to adopt it.

Continued Interoperability Issues with Network/Operating System Infrastructure

"Outstanding cloud-based HIPAA-protected FAX Service"

What do you like best about Upland InterFAX?

Upland InterFAX has not only been a great replacement for our on-prem solution(s) from acquired companies - centralizing into one service.

Their UI is very effective. They have an API to automate receipt of FAXs into our operational systems.

Their support is responsive, helpful, and effective.

What do you dislike about Upland InterFAX?

There are some elements of the account provisioning and reporting elements that they continue to work on that I would like to see improved - but far and away much better than other alternatives we reviewed.

Would DEFINITELY like to see InterFAX integrate an SSO solution into their native product!

"InterFAX Review"

Overall: easy to implement this product for our healthcare initiative with the government of Ontario. Amazing customer service - always responsive, available, and approachable. Very helpful.

Pros: Customer Service, Ease of use, Simple to implement. Excellent Support.

Cons: would like single sign on with O365 so users don't have to share a common account. they seem to keep locking the account when 100s of users are using the shared account. integrating with O365 would take care of this limitation.

An abstract graphic on a dark background. It features several overlapping circles: a large white one, a medium grey one, and a smaller dashed white one. Inside and around these circles are various colored dots (orange, purple, yellow) and 'x' marks (orange, blue, white). A dotted orange line starts from a small white square with an orange dot, curves upwards, and ends at a central orange dot within the dashed circle. In the bottom left, there's a white circle with a black 'u' and a large orange rectangle. A blue rectangle is partially visible above the orange one. A faint grid is visible in the bottom left corner.

Partner Discussion: Selling Fax Today

- What are the most important buying motivations for new opportunities?
- Who are your competitors?
- What is the one top business type that uses fax today in your area?
- How do your customers most use outgoing InterFAX?

What are top buying issues to purchase InterFAX?

- _____ Replace fax machines
- _____ Reduce current cost
- _____ Eliminate fax server
- _____ Regulatory compliance
- _____ Superior user interface/convenience
- _____ Email to fax feature
- _____ Print to fax feature
- _____ Increased volume requirement
- _____ Replace current vendor due to support
- _____ Replace current vendor to reduce cost
- _____ Audit trail feature

- Landing page for paid media
- Ad content for Google, Bing
- Sequence for sales representative

Behavioral Health Campaign: Emails

Patients entrust you with their care—and their PHI.

Hi Raquel,

These days, having simple-to-use fax software is a must for behavioral health clinics. Data security is always top-of-mind, yet in the first quarter of 2023 alone, millions of Americans have had personal health information exposed. We've seen hackers focus their cyberattacks on smaller hospitals and niche medical practices, as their existing systems are often more vulnerable.

Your patients' urgent care needs depend on you. With [Upland InterFAX's](#) best-in-class, HIPAA-compliant cloud-based software, you can protect your behavioral health practice from becoming a statistic while safeguarding your patients' PHI.

How do we make that happen? By providing cloud fax services that are:

- Protected by TLS encryption, user authentication, "delete upon delivery," and more
- Capable of transmitting confidential medical information between providers and patients
- In compliance with privacy standards like HIPAA, PHIPA, and PCI DSS
- Powered by in-country data storage centers

Ready to learn more? Read our recent blog, "[4 ways cloud fax technology streamlines the path to behavioral healthcare services](#)" as we outline challenges you're facing and the ways cloud fax can help. Then reach out below to book your customized product demonstration!

[Schedule my custom demo](#)

Looking forward to talking with you soon.

Thanks,

Raquel Sanchez

75% of health care communication, including PHI, is transmitted by fax. Are you secure?

Hi Raquel,

To remain compliant in the behavioral health industry and competitive in the market, your clinic's methods of communication must evolve as technology progresses and medicine advances.

[Upland InterFAX's](#) user-friendly web interface ensures secure, reliable communications to safeguard PHI and accelerate patient wellness and care. This empowers your staff by making faxing as simple as sending an email, while reducing IT maintenance and eliminating hardware upkeep.

Our HIPAA-compliant cloud fax service seamlessly integrates with leading EMR/EHR systems such as [Epic](#), so users can send PHI directly from a fax queue to the EMR.

Additional InterFAX security features include:

- Extra layer of security by hiding destination fax numbers
- Securely submit sensitive faxes with TLS-enabled communication to our servers
- User authentication enforces access roles with usernames and passwords
- Automatic fax removal of sensitive messages from our servers upon delivery
- Full audit trail of faxes sent and received
- Servers housed in secure environments, accessible only to approved personnel

Ready to see how it works? Reach out for a complimentary product demonstration to see how InterFAX can help you scale your communications and mitigate your security concerns.

Is your current communications process supporting timely patient care?

Hi Raquel,

Your busy staff already works tirelessly to provide your patients with efficient, comprehensive care to put them on the path to wellness. With needs around behavioral health continuing to rise in the U.S., is your current fax infrastructure able to reliably handle growing volumes of documents to support your staff's bandwidth and provide your clients with the timely services they need?

[Upland InterFAX](#) is trusted by behavioral health care professionals around the world to safely send and receive confidential, HIPAA-protected information instantly via the cloud. Empower your busy staff to send faxes, verify delivery, and access detailed records and reports from a central dashboard to benefit from results such as:

- Streamlined, time-sensitive patient communications
- Accelerated patient intakes and easier collaboration for fast referrals
- Better management for high-volume patient referrals
- Decreased data-security risks using TLS encryption, authorized user permissions, and more
- Full customization and scalability for your practice's variable needs
- Reduced burden on your IT team by taking fax to the cloud

[Watch this short video](#) to learn how InterFAX's HIPAA-compliant online fax service makes sharing medical information safer and simpler than ever before.

Ready to get started? Find time on my calendar at the link.

Business Operations / Cloud-based fax

4 ways cloud fax technology streamlines the path to behavioral healthcare services

4 minute read

Upland Admin

Needs for behavioral healthcare services are on the rise.

The need for behavioral healthcare services in the United States is growing exponentially. According to the Substance Abuse and Mental Health Services Administration (SAMHSA), one in five adults in the U.S. has a clinically significant mental health or substance use disorder, and the severity of mental health conditions among children and teens continues to accelerate. The Centers for Disease Control and Prevention (CDC) reports that the COVID-19 pandemic exacerbated the already rapidly accelerating opioid crisis, with

Behavioral Health Campaign: Paid media

PPC Landing page

The landing page features the upland logo in the top left corner. The main headline reads "Streamline the path to patient wellness". Below this, a sub-headline states "CLOUD FAX GETS IT DONE". The body text explains that as a behavioral health care facility, easy access to confidential patient documents is needed to accelerate the referral process and intake process. It highlights InterFAX's secure cloud-based fax software, which fosters quick and easy information transfers while ensuring HIPAA-compliant data security for behavioral health care facilities. A list of benefits is provided, including seamless integration with existing EMR/EHRs, quick and secure intake and referral processing, elimination of data security concerns, and monitoring of communications. A "Request a demo" form is prominently displayed on the right side, with fields for First Name, Last Name, Business Email, Job Title, Company Name, Country, and a Submit button. The page is decorated with abstract geometric shapes in purple, blue, and orange.

Capture capabilities

Accurately identify, extract and route.

Cloud fax opportunities

Enable business process automation

Improve accuracy and reduce cycle execution times and the requirements for manual input.

Simplify integrations

Grow user base and volume.

Cloud-first strategy

Central administration, reporting/logging/auditing, compliance, privacy and security.

InterFAX uniquely positioned to leverage market opportunities

Now

Consolidation of User Interfaces

Consolidating Secure Site & CP into UI, discontinuing support for old sites entirely. All Brands/Partners being moved carefully and individually.

SSO & API Authentication*

Available within UI, we are continuing implementation of SSO via OpenID Connect and SAML, as well as implementing API authentication.

Cover Page Functionality*

Further updates to allow for the usage of cover pages from a variety of sources, such as email and via API.

Pointing to an external URL

Added support for submitting a fax via REST API pointing to an external PDF URL file in addition to HTML files.

UI PCI Certification

The UI site is in this year's PCI certification scope, migration of PCI clients to start soon after the certification is complete (expected January 2024)

Next

UI Enhancements*

Improvements to the UI widgets, as well as further refinements to improve functionality and ease of use, based on testing and feedback from users.

Operational Improvements

Improvements to our billing systems and fraud detection processes, the completion of the Admin Supportability project, with three rounds of four releases having been completed already.

Large File Size Support

Available over SMTP, we will continue to expand support for large file sizes within the InterFAX services.

Technology Upgrades

Upgrades to our backend capabilities, providing increased scalability and security.

Mobile Web Views*

Mobile optimization for the InterFAX UI site.

Expanded Use of Callbacks

Utilizing and expanding upon callbacks to send inbound images and metadata, allowing us to target eFax clients who use the same functionality.

Payment Gateway Review/Providers

Review and updates to our payment processing abilities and options, in ongoing discussions with payment providers.

Later

Intelligent Capture Integration

Integrating Intelligent Capture into the InterFAX service.

Developer Documentation

Updates to our API and SDK documentation.

Customer Reporting*

Improvements to our reporting and auto-reporting capabilities, to better support customers and provide the information needed, to streamline business processes.

Inbound Call Blocking / Filtering

The ability to block and/or filter inbound transactions depending on requirements.

Single Sign-On!

We are very excited to announce that InterFAX now supports Single Sign-On (SSO) through **SAML and Open ID Connect**. Save time provisioning users, while also providing **Multi-Factor Authentication (MFA)** capabilities that are offered through these services.

Partner Support and Operations

Partner Support and Operations

- Overview of previous partners' open issues
- What's new with the InterFAX Support teams
- Support tickets overview

InterFAX Traffic

- InterFAX traffic
- Inbound success rates
- Outbound success rates per top destinations

InterFAX Operations Overview

- Recent technical issues
- InterFAX improvements and changes

InterFAX Partners Concerns From Previous VPC

UI Site

- ☐ The new UI has been released officially in February 2023 to all our customers. New release on October 22nd.
- ☐ Updating new CC / purchasing of new services in case of a debt & evaluation accounts converted to pre-paid when they try to purchase a service.
- ☐ Invoices issued for credit accounts automatically when adding a service instead at the end of month.
- ☐ "Received time" on exported csv/xml file of Inbound Faxes doesn't show JST. By design, data in export files is based on the time zone supplied by the browser.
- ☐ Translations in Japanese, Hebrew.

Faster support and improve handling of urgent tickets (Ongoing)

- ☐ Cloud and Service Management became One Team (Team also expanded)
- ☐ Cross training allocation of resources – Buddy System
- ☐ We have in place the OLA (Operational Level Agreements) for the internal teams, and a monthly meeting to review the outstanding issues and delays.
- ☐ New employees that are still learning – Kaleb was promoted as a CSM, and we have two new support representatives.
- ☐ In the process of implementing a triage process for the Support Team, to help solving the issues quicker. Urgent issues will be handled by the 2nd tier.
- ☐ For easier reporting and tracking of specific organization tickets, we are in the process of implementing Salesforce integration with Zendesk.

InterFAX Partners Concerns

From Previous VPC

Improving the billing process

- ☐ Issuing monthly invoices also for PP accounts in addition to credit accounts
- ☐ Add control in Admin to specify which PP invoices to be issued in .eml format
- ☐ Add controls so customers will not be invoiced twice in case there is a human mistake
- ☐ Adding automation in creating the monthly CDRs
- ☐ Adding translation of invoices when downloading from Admin site

Fixing the open issues in the new rendering engine

- ☐ We are focusing on specific files related issues. Some fixes in the HTML rendering released this year
- ☐ We continue to work on the new rendering PDF engine with the vendor
- ☐ We are looking at alternative vendors to help improve quality of our rendering service

Support Tickets Overview

Support Surveys

Ticket 1284836, 17/05/2023: "Daniel was awesome! I got the answers I needed, and the client was very pleased with his analysis of the issue."

Ticket 1347850, 16/08/2023: *"In the many years I have been in the technology business I never had a support request call go so smoothly. Micah is a smart and professional individual who knows the product and how to help diagnose issues. After only a couple of minutes on the phone our problem was determined and corrected. I only wish every company we deal with had a Micah. Thanks Again."*

Ticket 1277312, 03/05/2023: *"Quick response from Eoin Sheehan thanks once again for the support."*

Ticket 1246765, 11/04/2023: *"Excellent Support. John Brogan was very helpful in resolving my issue. Thanks...PS - Love the new interface."*

Ticket 1356196, 29/08/2023: *"Steve was brilliant to deal with, actioned my query promptly and provided great customer service while doing so! An asset to your team and company."*

InterFAX Fax Facts

- Best month ever: Aug23, with 59.9 million units
- Best day ever: October 4, with 3.15 million units
- Jan-Sept 2023: 10% increase from same period of 2022
- 1.74 attempts per fax
- 48.5% success rate of outbound fax attempts (overall success rate is 85%)
- 44% of faxes succeeded on first attempt
- 3.43 pages per fax (3.16 pages in Sept22)

InterFAX Recent System Issues

March – October 2023: No major system issues.

April 30th

Login.interfax.net - not available

Users experienced connectivity issues to the user site, login.interfax.net, as connections could not be validated. During this time, a "branding" error was observed when a user attempted to login.

All other services, including faxing, use of API, email to fax, etc. Continued to work as expected during this time.

Root cause: A domain controller where user access / authentication to where the site is controlled experienced a failure.

Remediation plan: The Cloud team worked with Microsoft to resolve the issue and implemented a backup plan for the primary DC.

July 27th

Login.interfax.net - unavailable for some users

It was discovered that all users experiencing the issue were using the same Internet Service Provider and that provider was degrading service through <https://login.interfax.net>. - AT&T.

Root cause: It was discovered that all users experiencing the issue were using the same Internet Service Provider and that provider was degrading service through <https://login.interfax.net>.

**InterFAX 99.95%
service uptime**

(<https://interfaxstatus.site24x7signals.com/>)

March – October 2023 System Changes

- October 15: Routine maintenance & updates required by AWS
- June – October: Firewall maintenance in Israel, Italy, Japan & Germany (Germany on the 16th of October)
- August 27: updating of encryption ciphers for PCI-DSS
- July 23: MySQL 8 upgrade phase 1 (on users' authentication database). Phase 2 to migrate the remaining customer instances to MySQL 8 to follow
- May 22: Urgent maintenance in UK by our hosting provider
- April 23: Routine maintenance and updates required by AWS
- Added +160 new fax channels from January 2023 until today (an increase of about 3%)
- Two new inbound international carrier: New numbers ordered & tested in Brazil, Peru, Argentina, Mexico, Poland, South Africa (in addition to Hong Kong, Singapore, New Zealand). We don't have numbers in the inventory, order by request due to regulations
- Migration from Verizon to Colt of German inbound numbers (ongoing)
- New fax servers in AWS for UK, Italy, Israel & Germany (ongoing)
- Upgrade of Windows servers to 2019/2022 (ongoing)
- In US, added support for T.38 fallback to G711 and G711 with fallback to T.38
