ROADMAP

FAQ

- + In which version will Upland Project Planner (UPP) be released?
 - + 2016 R1 is the first Tenrox version to include UPP
- + Which license do I need to get UPP?
 - + You need to be licensed for the Project Planning module
 - + For Express clients, the Project Management package includes UPP
- + Can I use UPP in an on-premise solution?
 - + UPP is a Cloud offering due to its architecture requirements
- + Do I need to install any plugins or download anything to use UPP?
 - + UPP can be used directly within your web browser with no add-ons or installs required

FAQ

- + What happens with my Tenrox Project Planner (TPP) projects?
 - + TPP and UPP plans are mutually exclusive; a project cannot be in both systems
 - + TPP plans are convertible to UPP during the upgrade
- + Do I still have access to TPP if I upgrade to 2016R1?
 - + TPP will be available for you to continue using for new projects or those in progress
- + How long will TPP be supported?
 - + Only critical bugs will be fixed on TPP
 - + No new features will be developed for TPP
 - + TPP will be deprecated mid-2017 once the features in UPP match those in TPP

LIVE DEMONSTRATION

POLL

Of the following Phase II Items, which would you rank as the highest priority?

1. Baseline Management
2. Project Plan Import / Export
3. Project Team Configuration
4. ETC & Assignment Change Requests
5. Other
