

# Education Services: Enterprise Upland Analytics for Qvidian

Learn to create real-time dashboards that provide insights into your organization's Qvidian activity, content usage, and engagement. Increase productivity and content quality, identify trends and opportunities, and prove your team's value.

## 24x7 Online Course Access

To best fit busy schedules, participants can complete this course online at their own pace. All learners will receive a handbook with added insights and suggested activities. Instructors are also happy to provide feedback and answer questions by email during the 3-month course period.

## One-On-One, Real-World Consulting

All learners receive up to 2 hours of one-on-one consulting calls with Qvidian experts. Working with actual account data, our experts can answer real-world questions and guide learners through account-specific use cases.

## Proven Course Outcomes

After completing this course, participants will be able to:

- **Create** custom analytics reports from scratch
- **Tailor** and fine-tune standard analytics reports
- **Understand** common data fields and controls
- **Design** dashboards to display collections of reports
