Qvidian

Easily revise answers with generative AI

Get a jump start on content creation or customize existing responses to better fit your customer's needs and preferences with generative AI.

Whether it's tweaking wording or incorporating additional information, users can effortlessly revise and refine AI-generated answers within Qvidian.

Get started faster with generative AI prompts

Need extra help getting started with generative AI? Qvidian's got you covered with pre-created prompts.

Use generative AI prompts to quickly generate new responses or update old ones. Users can also create their own prompts, save them for later use, or share them with other users and roles.
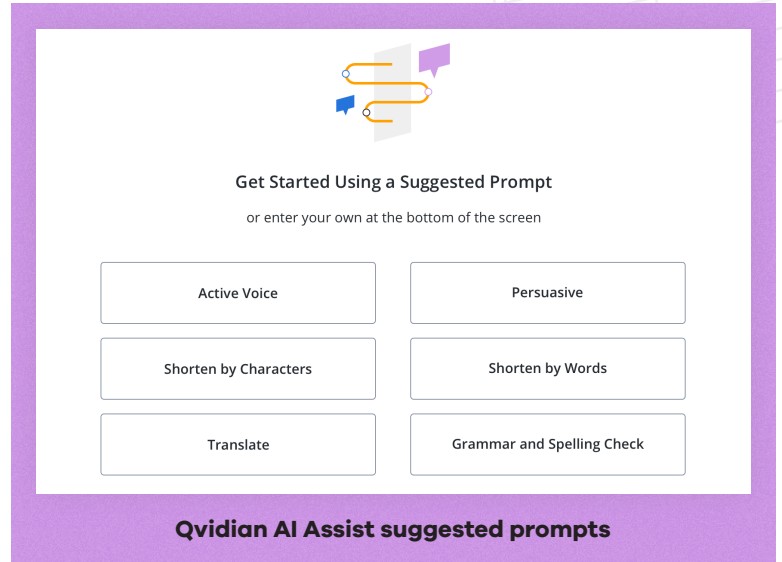

Flagged AI-generated answers for review

Qvidian is committed to accuracy because we know delivering accurate, compliant, and responsive responses is crucial to winning business.

When you generate a new answer using our generative AI features, we'll flag that answer for you so you can send it off for review by your human experts. This ensures that all of the content you generate aligns with company standards and maintains a consistent tone, style, and voice.
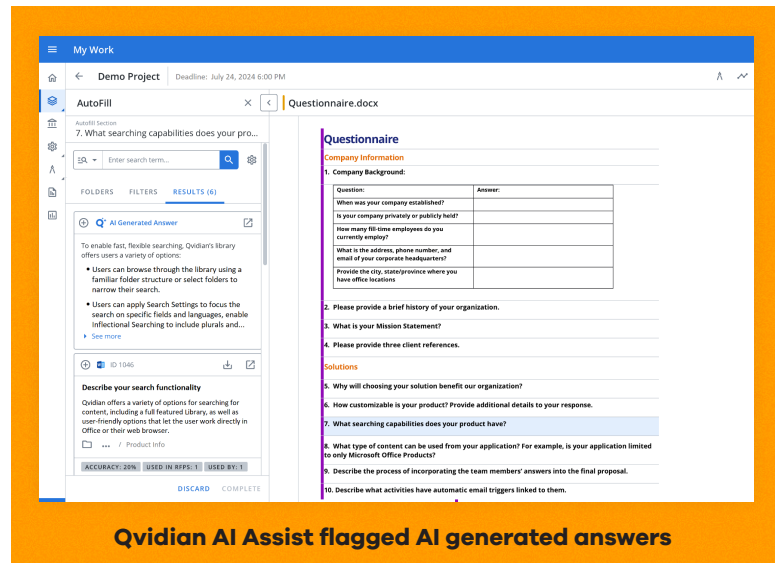

An easy-to-use conversational interface

Make generating new revisions a breeze with our conversational interface. To enhance the user experience and engagement, all of our AI generated responses are presented in a natural and easy-to-understand conversational format within Qvidian.
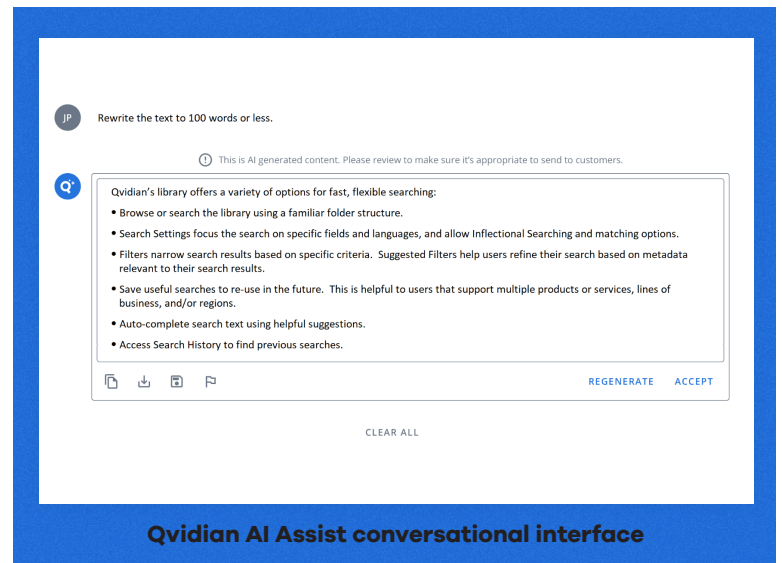

By presenting generated responses in a conversational format and allowing for editing, Qvidian promotes clarity, comprehension, and customization.
