

Education Services: Upland Analytics for RO Innovation

Learn to create real-time dashboards that provide insights into your reference activity, content usage, and engagement. Simplify reference management, identify trends and opportunities, and prove your team's value.

24x7 Online Access & Live Consulting

To best fit busy schedules, participants can complete this course online at their own pace. All participants will receive a handbook with added insights and suggested activities that relate concepts to real-world use cases. Instructors will provide two private 1-hour consulting calls to jump-start success and are happy to answer questions by email during the eight-week course period.

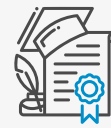

Proven Course Outcomes

After completing this course, participants will be able to:

- Create custom analytics reports from scratch
- Tailor and fine-tune standard analytics reports
- Understand common data fields and controls
- Design dashboards to display collections of reports
