

Qvidian University: Advanced Architecture

Course Overview

In Foundations, we covered the basics of architecture functionality, but this course takes it further. Those who complete this course will be able to architect document types from start to finish for their company – without needing help from Qvidian. The course includes all supported architecture functionality for both Word and PowerPoint document types. For Word document types, the course will cover architecture functionality supported in both the Project and Created Document user interfaces.

Course Objectives:

- Design document types (in both Microsoft Word and PowerPoint) that dynamically produce client-centered content with an intuitive end user experience
- Properly identify which architecture component to use, and how to configure each component, to allow for the desired output and user experience
- Know how to maintain document types to account for future branding or content updates

Delivery Method:

- Includes approximately 7 hours of course material and hands-on activities
- Online modules and activities
- Dedicated Qvidian training expert will monitor progress, provide feedback on practice document types and answer questions.
- Utilizes a Qvidian training site

Course Duration:

- Access to a dedicated trainer, online modules and Qvidian training account for four weeks
- Access to online modules for an additional week (5 weeks total)

Prerequisite:

- Completed Foundations course, or have basic template, architecture, and content management knowledge

Pricing:

- \$595 per participant
- Course registration is non-refundable.

Target Audience:

- Users who are a system admin/architect for their company's Qvidian accounts
- Learners who prefer to work at their own pace with a flexible schedule

Course Dates:

- June 7th – July 2nd
- July 12th – August 6th
- August 30th – September 24th
- October 4th – October 29th
- November 8th – December 3rd
- December 6th – December 31st
