

Qvidian University: Enterprise Upland Analytics for Qvidian

This course is for customers who have purchased Enterprise Upland Analytics, which gives them the ability to create their own reports and dashboards rather than only viewing the preset standard dashboards.

Course Overview

Upland Analytics is a reporting tool that uses real-time data to create a variety of customizable reports on activity, content, and users in your Qvidian instance. You can use Upland Analytics to view statistics and trends, such as content and document types usage, expired content, created documents and projects, and user activity. Create dashboards and configure email subscriptions to efficiently share these important insights with your internal stakeholders.

Course Objectives:

By the end of this course, participants will be able to:

- Create custom reports by modifying an existing standard report as well as starting from scratch
- Understand commonly used data fields available in Analytics
- Design dashboards to display collections of reports

Course Duration:

- Access to the on-demand course for 3-months. The private consulting hours must be used within the same 3 months or they are forfeited.

Pricing:

- \$885 USD per participant
- Course registration is non-refundable.

Delivery Methods:

- On-demand access to course demonstrations and explanations
- Up to 2 hours of private consulting phone calls with the instructor.
 - Questions? Ask your CSM for more details.
- Includes approximately 3 hours of course material and hands-on activities
- Dedicated Qvidian training expert will monitor progress, provide feedback on activities and answer questions
